SKILLS AND TECHNOLOGY

Programming: Python, Java, C, CSS, JS, Typescript, Scala, Shell, PowerShell.

Tools: Git, SVN, Jira, Jenkins, Ansible, Visual Studio, Tableau

Platforms: AWS, Azure, Postman, Docker, Artifactory, Databricks, Node.js

AWS Services: Lambda, fargate, S3, API Gateway, EC2, CloudFormation, CloudWatch, SQS, SNS, IAM, CloudFront, Secrets Manager, VPC

Databases: MySQL, MongoDB, MSSQL, DynamoDB

Testing: Junit, Mockito, TestNG, Playwright, Sinon.

Technologies: REST APIs, MVC

PROFESSIONAL EXPERIENCE:

Amazon Web Services, Software Development Engineer

July 2022 – Present

AWS Industry Products, Healthcare and Life Sciences

- Designed and implemented a scalable, serverless microservices architecture in Java and Typescript using AWS Lambda, SQS, and SNS, reducing operational overhead by **30%** and improving system reliability for high-throughput workflows.
- Optimized AWS Lambda cold starts through warm provisioning, pre-invocations, and strategic dummy calls, decreasing average response time by **40%** and improving API performance for latency-sensitive requests.
- Developed a reusable CDK package for provisioning AWS infrastructure across multiple services, streamlining deployments and reducing code duplication by 60%, improving developer efficiency.
- Spearheaded the creation of centralized monitoring dashboards in CloudWatch, enhancing visibility into system health, sensitive data access, and service performance, leading to a **25% reduction in incident resolution time**.
- Built and automated CI/CD pipelines with AWS CDK and TypeScript, integrating compliance checks for HIPAA, enabling secure deployments and ensuring regulatory adherence while improving deployment speed by **50%**.

Infosys Limited, Software Developer

Feb 2017 – Dec 2020

Enterprise project data migration Solution for Schneider Electric & General Electric

- Built an Automated Migration Solution in Agile to migrate 1.3k+ projects, 2+ TB of micro data of project trackers, source code, files, wiki, builds data from TeamForge to enterprise applications such as Jira, GitHub, Box, Confluence & Artifactory with Python, REST APIs, SDKs in AWS.
- Designed Robust data migration pipeline with minimal human intervention. Involved in Requirements Gathering, POC, Customer interaction, Architecture Design, Project Development and Deployment.

Enterprise Tools Management for John Deere

- Developed a Splunk-like application for regularly extracting logs from 100+ cloud and legacy servers to analyze and create stats to understand application use & licensing consumptions, eliminating 40 man-hours/month with 99% accuracy and assisting in business decision-making by updating Tableau dashboard.
- Implemented terraform and AWS SDKs with Python scripts to provision and monitor enterprise applications in AWS.
- Migrated and facilitated LDAP Auth to SSO for GitHub Enterprise users while improving on automated license management.
- Automated 35+ issue resolution workflows with Python/Shell scripts and SDKs/REST APIs, resulting in reduction of ~200 tickets/month and 12% increase in account revenue QoQ.

EDUCATION

Arizona State University

Jan 2021 – Dec 2022

Master of Science in Information Technology

3.94 / 4.0 GPA

- Courses: Analyzing Big Data, Adv Data Structures and Algorithms, Adv Database Management Systems, Information Systems Development, Cloud Architecture Info Tech, Middleware Programming & Database Security

Walchand College of Engineering, Sangli, India. B.Tech in Electronics Engineering

Aug 2012 – May 2016

ACADEMIC PROJECTS

Stroke prediction with Spark, Big Data, class Project

Nov 2021

- Obtained 95.5% accuracy with Decision Tree Classifier algorithm in PySpark on Databricks.
- Performed data analysis, preparation with spark SQL functions, model training and testing

Airlines Customer satisfactions, classification problem

May 2021

- From the customer data who have already flown, predicted whether a future customer would be satisfied or not with 92% accuracy. Implemented various classification models to get best results.

Full Stack IT Asset management website, Express, MySQL

Nov 2021

- Developed project in Agile with DB designs, ERD, Sys design to learn project management and development for class IFT510

INITIATIVES AND RESPONSIBILITIES

Rotaract Club of WCE Sangli | Member, Editorial Board, Organized Blood donation camps, RAINBOW event for orphanages. May 2013-16

Electronics Engr. Student Association, WCE Sangli | Editor-in-chief, creating editorials/newsletters, manage PR team. July 2014 -16
